CCDC Inject #2

Inject Name	CMMC Data Classification Policy
Inject ID	DCP102

Background:

From the CISO: "Our auditors just told me because of certain clients we have we need to be CMMC compliant and we need a data classification policy for that. Can you help with this?? Make sure the policy is clear, practical, and meets CMMC requirements but don't make it too technical! This needs to be read and understood by all MotoCorp employees!"

Inject Description:

Create a data classification policy that includes the following elements:

- Data sensitivity levels
- Examples of data at each level
- Policy for controlled access data

Also provide the CISO with information about what clients may require CMMC compliance.

Inject Guidelines
Center and label all screenshots
Consistent font style and size
Label all tables (if any)
Don't use technical terms that non-technical users won't understand. Make the inject understandable for non-technical audience
Double check for grammatical or spelling errors

Submission Instructions:

Email your policy to justin_giboney@byu.edu.
